

## **BP Shipping Marine Distance Tables**

The UKHO have negotiated to attain distribution rights and will soon have BP Shipping Marine Distance Tables available to order. This means that if ordered through DPM, we will still be able to maintain your current trade discount on this product which would not be available if purchased direct. To help us establish the initial demand and to make sure we can meet required orders, we would be grateful if you could indicate whether you are likely to order.

The BP Shipping Marine Distance Tables are a collaborative project between BP Shipping, Worldscale and AtoBviaC. The tables will provide, in digital format, all sectors of the shipping industry with a definitive source of high quality data.

The tables can be used for a wide range of activities including voyage calculations, calculating a voyage schedule, voyage bunker planning and speed performance evaluation.

Features include:

- ? Shortest route or reduced environmental impact route
- ? Routes and distance calculations
- ? Graphical route display
- ? ETA information
- ? Routing control
- ? High Resolution Maps
- ? Regular Updates

There are two versions available, Standard and Professional. Both versions of the software are sold on an annual subscription basis.

Professional Service RRP £999 excluding VAT

Standard Service RRP £499 excluding VAT

As indicated above, the above prices are subject to your normal trade discount.

Please see the attached Acrobat reader file for product info., if you require any further information regarding this product please visit AtoBviaC's website:
