

AtoBviaC BP Shipping Marine Distance Tables -

The UKHO has reached agreement with AtoBviaC to act as distributors of the new digital interactive BP Shipping Marine Distance Tables. As of 1 December 2004, the UKHO will hold stock of this product .

About AtoBviaC BP Shipping Marine Distance Tables

The BP Shipping Marine Distance Tables are a collaborative project between BP Shipping, Worldscale and AtoBviaC. The tables can be used for a wide range of activities including voyage calculations, calculating a voyage schedule, voyage bunker planning and speed performance evaluation.

There are two versions of software, Professional and Standard. Both versions are sold on an annual subscription basis. Subscribers have unlimited updates to both the data and software as new ports, routes and functionality are added throughout the year. If the subscription is not renewed the software will continue to operate indefinitely, but with the functionality and data fixed at the time the subscription expires.

Standard Features Include:

Graphical route display
ETA information
Routing Control
Advanced routing with over 80 more routing options
Alias Port System (Under Development)

Professional Features Also Include:

High resolution maps
Advanced port searching based on the marine atlas
Port and canal delays
Multiply voyage legs
Nominate additional ports for inclusion in the tables - 1
Additional distance requests - 10
User defined alias ports (under development)

Further information can be obtained from the AtoBviaC website: www.atobviac.com
